FACILITIES PLANNING

The Board of Education recognizes that sound planning based on accurate information is essential to the provision of suitable educational facilities. In order to assure that future District construction is planned on the basis of need, the Board will prepare a five-year demographic and enrollment analysis and forecast and will update that forecast every year thereafter.

In order to apprise the Board of the continuing relevance of the enrollment analysis, the Superintendent shall annually report to the Board on the number of resident pupils attending private school by grades if available and shall report to the Board on the enrollment by grades during the school year. The Superintendent shall also conduct a kindergarten roundup each spring of the pupils who will be enrolled in the schools of the District in September of the year in which the estimate is made and report the results to the Board.

The Superintendent shall determine annually the need for a School District census and shall recommend to the Board such action as he/she deems necessary.

In planning for the enlargement or modification of its facilities, the Board shall consider not only the number of children whose educational needs must be met, but also the physical requirements of the program it deems best suited to meet those needs. Each school building and site shall provide suitable accommodations to carry out the educational program of the school, including provision for the handicapped, pursuant to law and rules of the State Board of Education.

Revised School Code PA 289 of 1995 - Section 11A

Adopted: January 18, 1971
Revised: June 4, 1984
Revised: December 1, 1997
