

Quick Start Guide for Families

Using the Student Learning Center

Welcome to *Everyday Mathematics!*

Your student is in a classroom using *Everyday Mathematics* and will be accessing online resources. Below is the login information to access these materials on your home computer. Your student's teacher may choose to use simplified logins for the class. If so, you will receive a special url for your student's class, with a simple three-symbol password.

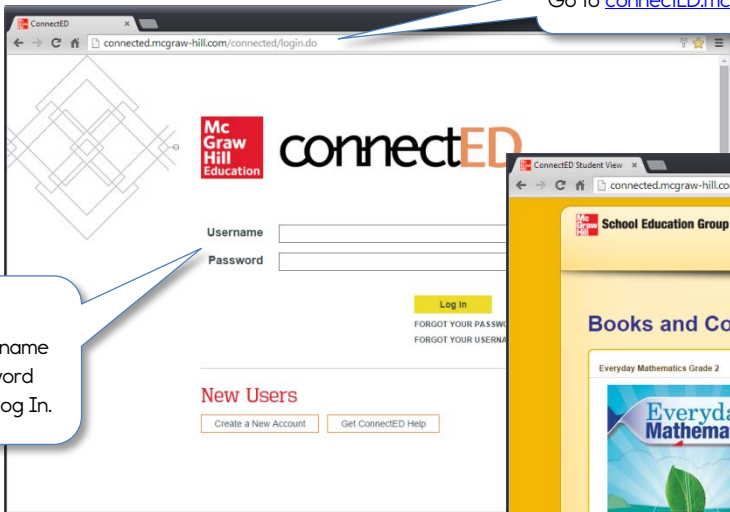

connectED.mcgraw-hill.com

username: _____

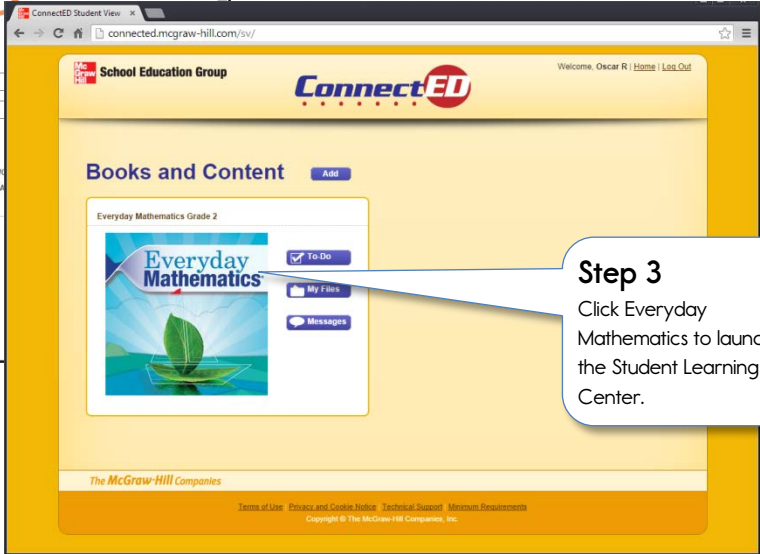

password: _____

Step 1
Go to connectED.mcgraw-hill.com.

Step 2
Enter username and password and click Log In.

connectED.mcgraw-hill.com

Step 3
Click *Everyday Mathematics* to launch the Student Learning Center.

Exploring the *Everyday Mathematics* Student Learning Center

After you login, your student will come to the lesson landing page. The landing page always shows today's lesson.

Bubbles that are shaded in blue are features that are coming soon.

Go to the Lesson Activities
Click here to get to the digital activities for today's lesson.

My Reference Book
Opens the eBook of the *My Reference Book*. Find videos that explain concepts.

EM Games Online
Click here to play games with your student like the ones they play at school.
COMING DECEMBER 2014

eToolkit
Have fun exploring the eToolkit, which contains virtual versions of math manipulatives.

Favorites
Have your student show you activities they have marked as favorites.
COMING IN 2015

Assignments
Click here to find assignments the teacher has created.
COMING IN 2015

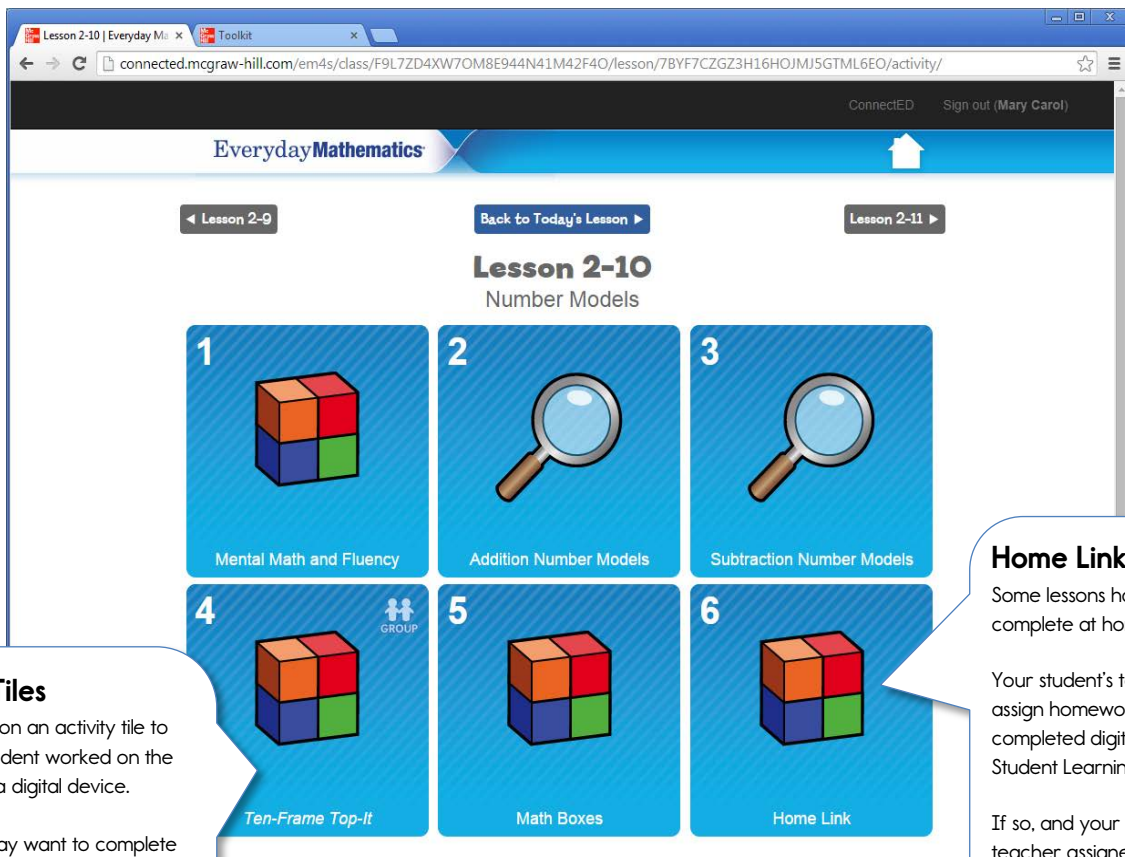

EM at Home
Links to resources for families. Includes PDFs of Home Links, Family Letters, a literature list, and more.
COMING DECEMBER 2014

NEXT Click the big "Go to Lesson" tile.

Lesson Activities Page

If you clicked on “Go to Lesson” from the previous page, you will find yourself here on the Lesson Activities page. Each numbered tile is an activity that is available to your student to complete digitally while in class.

Many activities in *Everyday Mathematics 4* can be completed digitally. You may want to check with your student’s teacher to see if their class is completing activities in class using iPads, laptops, or other digital devices.

Activity Tiles

You can click on an activity tile to see if your student worked on the activity using a digital device.

If not, they may want to complete the activity at home with you.

Note:
Teachers may choose not to complete the activity digitally and instead use paper and pencil. Either choice is appropriate.

Home Link

Some lessons have activities to complete at home.

Your student’s teacher may assign homework to be completed digitally using the Student Learning Center.

If so, and your student’s teacher assigned homework for this lesson, click on the Home Link tile to launch and complete the activity.

NEXT Click a blue activity tile to launch an activity.

Activity View

If you clicked on a blue Activity tile on the previous page, you go to the Activity View. This is where students complete the activity.

For some activities, they write or type their answers. For others, they choose an answer. Sometimes, they need to use eTools to think through a problem and show their work.

Home
Click the Home button to return to the Lesson Activities Page.

More Screens
Many activities have more than one screen. Click the arrows or the drop-down to go to the next or previous screen.

Activity Kit
The Activity Kit gives your student access to Hints, eToolkit, My Reference Book and other resources to complete the activity.

Writing Tools
Writing Tools like pen and text tools allows students to write out and save their work.

eTools
Some activities, like this game, use eTools like the dice and counters.

Scratch Pad
If more space is needed to work, scroll down to the scratch pad.

NEXT Click open the Activity Kit and select eToolkit.

eToolkit

You and your student may have fun exploring the eToolkit. If you would like to launch the full eToolkit, click the Activity Kit in the bottom left, and the eToolkit will open in a new tab or window, with access to all eTools in the eToolkit.

The eToolkit is also available from the landing page. (See page 2.)
