Math Exploration and Enrichment Summer Learning Program

Incoming 7th – 8th grade students Course #94006A

8:00am – 11:00am

\$150 or (\$75 for those students who have been recommended by their RCS counselors)

This exciting new course is designed to give all levels of middle school students an opportunity to experience math through activities with an open, visual, and creative approach. Students will engage in tasks that can be seen and solved in different ways while learning important math concepts. The Youcubed organization at Stanford University was created by math educator Jo Boaler and provides the foundation for this course. Included in the lessons will be brain research describing how our brains change when we learn new ideas. Parents are encouraged to explore www.youcubed.org for more information about the basis for this class. This class is targeted for students entering grades 7 – 8.

The class is only available in Session 1 (June 19 - July 3)

(*subject to enrollment numbers)

Van Hoosen Middle School

1339 N. Adams Rd
